Inspire the Next

 Hitachi Energy

19 September 2024

09:00 - 10:30 AM

Room One, Grand Ballroom

Oman Convention & Exhibition Centre

### Session Outline

The session will feature case studies demonstrating the practical application of eco-efficient products, such as innovative gas mixtures for high voltage applications and biodegradable insulation fluids for transformers. These examples illustrate significant reductions in carbon footprint and ecological impact, highlighting the tangible benefits of adopting sustainable technologies.

Participants will gain insights into the strategic importance of integrating sustainability into their operations, the methodologies for effective implementation, and the broader impact on achieving global climate goals.

### Key Topics Covered

- The urgency of addressing climate change within the energy sector
- EconiQ™ Consulting's four pillars and their role in sustainability
- Application of Life Cycle Assessments (LCA) and the GHG Protocol
- Practical case studies on eco-efficient technologies
- Strategies for reducing carbon footprint and enhancing sustainability

This session aims to provide a comprehensive understanding of how the energy sector can navigate the complexities of sustainability and make informed decisions to foster a greener future.
